

NINES

THE KEY TO LIVING WELL IS LIVING *WITH EASE*

You've earned a luxury lifestyle, but managing homes and household staff is complicated. Nines offers household management software built to simplify and elevate your household, so you can live with ease.

Set your staff up for success

You've brought in the right person to keep your home running smoothly. With Nines, you can give them the support they deserve by providing them with clear guidance on your preferences, best-in-class training, and tools built specifically for household management. Get staff up and running quickly, reduce burnout, and retain your best people.

Create order with a modern household manual

With Nines, you'll have a smart household manual in weeks, so you can easily manage properties, assets, vendors, staff, projects, and more. Our dynamic platform was designed by industry experts, with templates, tips and best practices built into the system. Plus, our in-house estate management team provides guided onboarding so your manual is set up the right way from the beginning.

Maintain continuity

Nines is the go-to place for your household management team to get work done — which means that information is stored in a platform you own and control. No matter who comes and goes, you can keep a searchable historical record (for yourself and for future generations).

Protect your investment

With a central operating system for your home, your household staff can operate more efficiently, saving you time and money on a regular basis. Nines makes it easy to plan and track preventative maintenance for your properties and everything within them, so you can reduce the risk of damage and preserve your most valuable assets.

Prioritize security

Do your staff members store your private information in text messages and emails on their personal phones? Nines helps you safeguard your data and protect your privacy. The platform is built with security first, and backed by AWS's highest available security standards.

Nines is a household management platform and mobile app, backed by VCP Ventures (Marc Lore and Alex Rodriguez), and advised by Marta Perrone. We were recently named winners of the 2024 WealthTech Americas Awards and the 2024 Family Wealth Report Award for Innovation as well as a top Family Office solution in Forbes.
